## PROFESSIONAL PROFILE

I am a committed Junior **Full Stack developer** and a **UX/UI Designer** with a great desire to improve and acquire new skills.

---

## EXPERIENCE

### • Portfolio | 2022

I used **Angular** and **Bootstrap** to create an attractive and highly interactive user interface.

For the logic I implemented **Java** together with the **Spring Boot** framework, while I managed the database with **MySQL**. Added security measures using **Spring Security** and performed extensive testing to ensure optimal performance.

This project taught me better **organization** and web architecture by writing cleaner code thanks to its strongly **typed languages**.

---

## TECHNOLOGIES

- HTML5 | CSS3 | Bootstrap.
- Javascript[ES6] | Typescript
- Java | MySQL
- Angular | Spring Boot
- Git | GitHub
- Web development
